

The trends of average of max_mtps and max_teps_stderr_base for nnode. Details are shown for tag. For pane Max_teps_stderr_base: Size shows max_teps_stderr_len. Details are shown for machine and tag. For pane Average of max_mtps: The marks are labeled by machine. The data is filtered on Exclusions (id,machine,nnode,tag), nworkers, nnode, nnode,flushticks, nnode,nworkers and problem. The Exclusions (id,machine,nnode,tag) filter specifies a set. The nworkers filter keeps no members. The nnode filter keeps 2, 4, 8, 12 and 16. The nnode,flushticks filter specifies a set. The nnode,nworkers filter specifies a set. The problem filter keeps centrality25. The view is filtered on tag and machine. The tag filter keeps 11#pal_fixed_mergestats-28-g31d1d8c, cougar#small, cougar#smaller_retry and cougar#snap-3-gb4041e3. The machine filter keeps XMT, XMT and Grappa.
