

The trend of maximum of `max_mtps` for `nworkers` broken down by scale. Color shows details about `network_ifs`. Details are shown for various dimensions. The data is filtered on Exclusions (`nworkers, scale`), `nworkers` and Exclusions (`network_ifs, chunk-size, flushticks, id, nworkers, ppn, scale, threshold`). The Exclusions (`nworkers, scale`) filter specifies a set. The `nworkers` filter has multiple members selected. The Exclusions (`network_ifs, chunk-size, flushticks, id, nworkers, ppn, scale, threshold`) filter specifies a set. The view is filtered on `scale`, `network_ifs`, `threshold`, `ppn`, `flushticks`, `chunksize` and `pollticks`. The `scale` filter keeps 27. The `network_ifs` filter keeps 32 and 96. The `threshold` filter keeps 32. The `ppn` filter keeps 6. The `flushticks` filter keeps 2000000. The `chunksize` filter keeps 64. The `pollticks` filter keeps 20000.
